From nearly 500,000 field grown chrysanthemums we select the most choice Mother plants for propagating. The cuttings are grown under artificial lights in sterilized soil and sprayed regularly with parathion. No finer, healthier or better plants are grown by anyone. We ship strong rooted or well established pot plants with solid ball of earth. Experience

proves these are the most practical, most reliable and most satisfactory plants to ship and plant. Each year we receive scores of letters complimenting us on our fine mum plants.

Spidery Thread-like FUJI MUMS

This interesting and increasingly popular class of novelty chrysanthemums have long cord-like quilled petals usually fish-hooked or spoon-like tips (see color pictures opposite page). The large blooms are graceful but of eccentric form. For extra large saucer size show blooms, leave 3 to 4 stems on each plant and disbud leaving only one terminal bud per stem, and fertilize. Varieties listed bloom mid to late October which is the earliest blooming date for Fuji mums. They make a most unusual showing in the garden and are excellent for bouquets and are favorites to win prizes at flower shows. We recommend winter protection in the North.

HUGE HYBRID BLUEBERRIES

These big, luscious, marble size U. S. Dept. of Agri. hybrids are so good for eating fresh or delicious in pies, preserves and canned or frozen. The attractive shrub-like plants bear large clusters of mild, sweet fruit, easy to pick. They require no spraying and it is easy to grow blueberries if you make the soil acid and mulch heavy with peat, sawdust, oak leaves or any organic matter. A heavy mulch is better than cultivation. If soil is sweet or alkaline mix thoroughly with aluminum sulphate. We send sufficient aluminum sulphate with each

order for planting 1st year. Plant no less than two varieties for pollination. The plants grow for a lifetime and have handsome glossy foliage that changes red, gold and orange in fall. Beautiful pink-tinged white fragrant blooms on compact bushy plants make blueberries ideal for hedges or landscaping your yard. Hardy throughout U. S. A. You will get more and larger fruit if the old canes are pruned so the plants keep new shoots coming. On good blueberry land a gross sales of \$1,200 per acre selling wholesale is the average income.

WEYMOUTH—23F17—Improved early ripening hybrid.
STANLEY—23F18—Excellent mid-season ripening hybrid.
PEMBERTON—23F19—Recommended, late ripening hybrid.

Prices of Blueberry varieties listed and numbered above. State name, quantity, catalog number, size and price. Plant 2 or more a few feet apart for pollination to insure good fruiting.
